[Rust in the Lab - White Paper](#)

Good afternoon,

Who/What: The Software Development team is hosting a company-wide RFC meeting on what language Astoria should be written in, focusing on the business consequences of that decision. This will NOT be a technical meeting.

Action Items:

1. 2min [What is Rust?](#) Read the Rust homepage
2. **Optional** Selections from a C++ FAQ:
 1. 1min [Does it matter which programming language I use?](#)
 2. 3min [Is C++ better than any other language?](#)
 3. 2min [How should business and technical decisions weigh against each other?](#)
 4. 1min [What are some features of C++ from a business perspective?](#)

Why: The default position of the industry is to write software like Astoria in C and C++. A proposal has gone through the Software team discussing switching to Rust. This meeting is meant to ensure the selection process identifies all (company-wide) risks and stakeholders of the decision, and ensure those stakeholders are on the same page.

Thank you,

Zach Allen
